Bioworld Technology,Inc.

# Cyclin D3 (G277) polyclonal antibody

Catalog: BS1393 Host: Rabbit Reactivity: Human, Mouse, Rat

#### **BackGround:**

The inactive ternary complex of cyclin D/CDK4 and p27 Kip1 requires extracellular mitogenic stimuli for the release and degradation of p27 concomitant with a rise in cyclin D levels to affect progression through the restriction point and Rb-dependent entry into S-phase. The active complex of cyclin D/CDK4 targets the retinoblastoma protein for phosphorylation, allowing the release of E2F transcription factors that activate G1/S-phase gene expression. Levels of cyclin D protein drop upon withdrawal of growth factors through downregulation of protein expression and phosphorylation-dependent degradation. Although the D-type cyclins are not fully redundant, cyclin D3, like D1, plays a prominent role in differentiation and proliferation, which correlates with higher expression levels of cyclin D3 in various cancers.

### **Product:**

1 mg/ml in Phosphate buffered saline (PBS) with 0.05% sodium azide, approx. pH 7.2.

## **Molecular Weight:**

~ 34 kDa

#### **Swiss-Prot:**

P30281

# **Purification&Purity:**

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### **Applications:**

IHC: 1:50~1:200

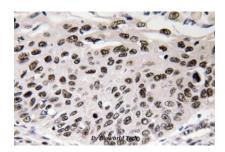

# Storage&Stability:

Store at  $4\,\mathrm{C}$  short term. Aliquot and store at -20  $\mathrm{C}$  long term. Avoid freeze-thaw cycles.

#### **Specificity:**

Cyclin D3 (G277) polyclonal antibody detects endogenous levels of Cyclin D3 protein.

#### **DATA:**

Immunohistochemistry (IHC) analyzes of Cyclin D3 (G277) pAb in paraffin-embedded human lung carcinoma tissue.

# Note:

For research use only, not for use in diagnostic procedure.
