

## BRK polyclonal antibody

Catalog: BS62244

Host: Rabbit

Reactivity: Human,Mouse,Rat

### BackGround:

The protein encoded by this gene is a cytoplasmic non-receptor protein kinase which may function as an intracellular signal transducer in epithelial tissues. Overexpression of this gene in mammary epithelial cells leads to sensitization of the cells to epidermal growth factor and results in a partially transformed phenotype. Expression of this gene has been detected at low levels in some breast tumors but not in normal breast tissue. The encoded protein has been shown to undergo autophosphorylation. Alternative splicing results in multiple transcript variants.

### Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

### Molecular Weight:

~ 57 kDa

### Swiss-Prot:

Q13882

### Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:

WB:1:500~1:1000

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Specificity:

BRK polyclonal antibody detects endogenous levels of BRK protein.

### DATA:

Western blot (WB) analysis of BRK polyclonal antibody at 1:500 dilution

LaneA:The Colon tissue lysate of Mouse

LaneB:The Colon tissue lysate of Rat

### Note:

For research use only, not for use in diagnostic procedure.
