

## Vimentin (Phospho-S39) polyclonal antibody

Catalog: BS64569

Host: Rabbit

Reactivity: Human,Mouse,Rat

### BackGround:

Cytoskeletal intermediate filaments (IFs) constitute a diverse group of proteins that are expressed in a highly tissue-specific manner. Intermediate filaments are constructed from two-chain,  $\alpha$ -helical, coiled-coil molecules arranged on an imperfect helical lattice and have been widely used as markers for distinguishing individual cell types within a tissue and identifying the origins of metastatic tumors. One such intermediate filament protein, Vimentin, is a general marker of cells originating in the mesenchyme. Vimentin is frequently coexpressed with other members of the intermediate filament family, such as the cytokeratins, in neoplasms including melanoma and breast carcinoma.

### Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

### Molecular Weight:

~ 57 kDa

### Swiss-Prot:

P08670

### Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:

WB:1:500~1:1000

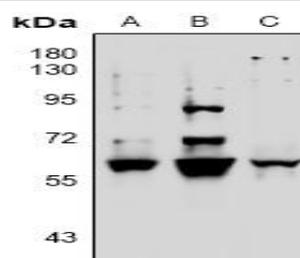

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Specificity:

Vimentin (Phospho-S39) polyclonal antibody detects endogenous levels of Vimentin protein only when phosphorylated at Ser39.

### DATA:

Western blot (WB) analysis of Vimentin (Phospho-S39) polyclonal antibody at 1:500 dilution

LaneA:PMVEC whole cell lysate

LaneB:A2780 whole cell lysate

LaneC:3T3-L1 whole cell lysate

### Note:

For research use only, not for use in diagnostic procedure.
