

ADAMTSL1 polyclonal antibody

Catalog: BS71869

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

This gene encodes a secreted protein and member of the ADAMTS (a disintegrin and metalloproteinase with thrombospondin motif) family. This protein lacks the metalloproteinase and disintegrin-like domains, which are typical of the ADAMTS family, but contains other ADAMTS domains, including the thrombospondin type 1 motif. This protein may have important functions in the extracellular matrix. Alternative splicing results in multiple transcript variants encoding distinct proteins.

Product:

1mg/ml in PBS with 0.1% Sodium Azide, 50% Glycerol.

Molecular Weight:

42kDa

Swiss-Prot:

Q8N6G6

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB 1:500 - 1:2000

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

ADAMTSL1 polyclonal antibody detects endogenous levels of ADAMTSL1 protein.

DATA:

Western blot analysis of extracts of various cell lines, using ADAMTSL1 antibody at 1:3000 dilution.

Note:

For research use only, not for use in diagnostic procedure.
