

CD63 polyclonal antibody

Catalog: BS72936

Host: Rabbit

Reactivity: Human,Rat

BackGround:

The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. The encoded protein is a cell surface glycoprotein that is known to complex with integrins. It may function as a blood platelet activation marker. Deficiency of this protein is associated with Hermansky-Pudlak syndrome. Also this gene has been associated with tumor progression. Alternative splicing results in multiple transcript variants encoding different protein isoforms.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Molecular Weight:

~ 53 kDa

Swiss-Prot:

P08962

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB 1:500 - 1:1000

IHC 1:50 - 1:200

Storage&Stability:

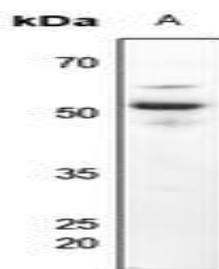

Store at 4 °C short term. Aliquot and store at -20 °C long

term. Avoid freeze-thaw cycles.

Specificity:

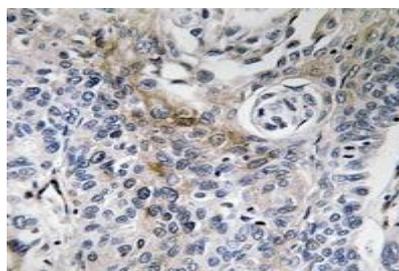

CD63 polyclonal antibody detects endogenous levels of CD63 protein.

DATA:

Western blot (WB) analysis of CD63 polyclonal antibody at 1:1000 dilution

LaneA:The Liver tissue lysate of Rat(40ug)

Immunohistochemistry of paraffin-embedded human lung cancer using CD63 antibody.

Note:

For research use only, not for use in diagnostic procedure.
