

FITC mouse anti-human CD19 monoclonal antibody

Catalog: MB8613F

Host: Mouse

Reactivity: Human

BackGround:

CD19 is expressed on follicular dendritic cells and B cells. In fact, it is present on B cells from earliest recognizable B-lineage cells during development to B-cell blasts but is lost on maturation to plasma cells. It primarily acts as a B cell co-receptor in conjunction with CD21 and CD81. Upon activation, the cytoplasmic tail of CD19 becomes phosphorylated, which leads to binding by Src-family kinases and recruitment of PI-3 kinase.

Product:

Mouse IgG1,PBS(pH7.2),0.09% sodium azide.

Molecular Weight:

N/A

Swiss-Prot:

P15391

Purification&Purity:

Protein A affinity purified

Applications:

FC:10ul per test

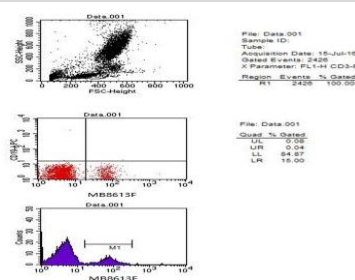

Storage&Stability:

Store at 4 °C . Avoid freeze.

Specificity:

This antibody detects Extracellular domain of human CD19.

DATA:

Flow cytometry analysis of human monocytes.

Note:

For research use only, not for use in diagnostic procedure.
