

Cytochrome P450 4Z1/2 polyclonal antibody

Catalog: BS30870

Host: Rabbit

Reactivity: Human, Rat

BackGround:

Q5VVE4 corresponds to a poorly characterized protein of limited functional annotation in public databases. Antibodies against this target are typically used to investigate the expression and localization of this protein in research samples.

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~59.1 kDa

Swiss-Prot:

Q5VVE4; Q8N1L4

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/1000), IHC (1/100 - 1/200), IF/ICC (1/50 - 1/200)

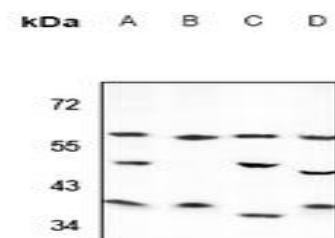

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

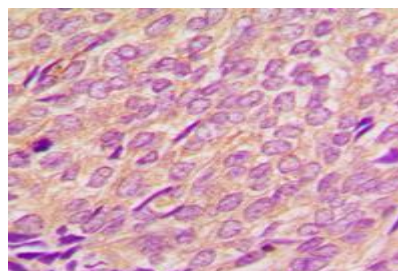

Recognizes endogenous levels of Cytochrome P450 4Z1/2 protein.

DATA:

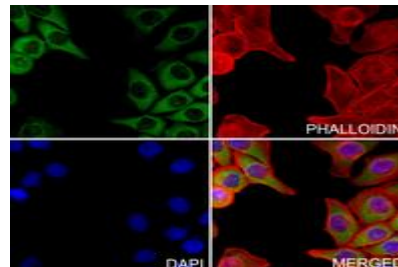

Western blot analysis of RhoBTB1 expression in CT26 (A), C6 (B),

HEK293T (C), SGC7901 (D), U87MG (E) whole cell lysates.

Immunohistochemical analysis of RhoBTB1 staining in human brain formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Immunofluorescent analysis of RhoBTB1 staining in A549 cells. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with a Alexa Fluor 594-conjugated secondary antibody (red) in PBS at room temperature in the dark.

Note:

For research use only, not for use in diagnostic procedure.
