MEKK15 polyclonal antibody

Catalog: BS31031

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

Mitogen-activated protein kinase kinase kinase 15: Serine/threonine kinase which acts as a component of the MAP kinase signal transduction pathway. Once activated, acts as an upstream activator of the p38 MAPK signal transduction cascade through the phosphorylation and activation of several MAP kinase kinases. May function in a signal transduction pathway that is activated by various cell stresses and leads to apoptosis. Involved in phosphorylation of WNK4 in response to osmotic stress or hypotonic low-chloride stimulation via the p38 MAPK signal transduction cascade.
