

PRODUCT DATA SHEET

Bioworld Technology, Inc.

MOX-1 polyclonal antibody

Catalog: BS31258

Host: Rabbit

Reactivity: Human

BackGround:

Homeobox protein MOX-1: Mesodermal transcription factor that plays a key role in somitogenesis and is specifically required for sclerotome development. Required for maintenance of the sclerotome polarity and formation of the cranio-cervical joints. Binds specifically to the promoter of target genes and regulates their expression. Activates expression of NKX3-2 in the sclerotome. Activates expression of CDKN1A and CDKN2A in endothelial cells, acting as a regulator of vascular cell proliferation. While it activates CDKN1A in a DNA-dependent manner, it activates CDKN2A in a DNA-independent manner. Required for hematopoietic stem cell (HSCs) induction via its role in somitogenesis: specification of HSCs occurs via the deployment of a specific endothelial precursor population, which arises within a sub-compartment of the somite named endotome

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~28.0 kDa

Swiss-Prot:

P50221

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/2000), IF/ICC (1/50 - 1/200)

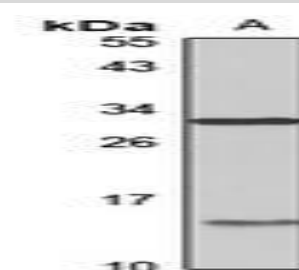

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

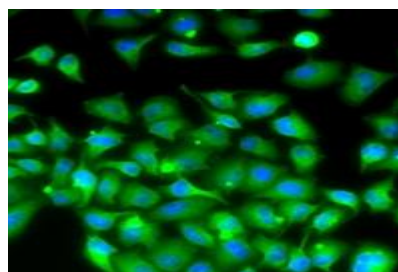

Specificity:

Recognizes endogenous levels of MOX-1 protein

DATA:

Western blot analysis of MOX-1 expression in HeLa (A), HT29 (B), mouse heart (C), rat liver (D) whole cell lysates.

Note:

For research use only, not for use in diagnostic procedure.
