DATA:

Western blot analysis of PCNA expression in A431 (A), HeLa (B), HepG2 (C), Raji (D), MOLT4 (E) whole cell lysates.

Immunohistochemical analysis of PCNA staining in human cervical cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Flow cytometric analysis of MOLT4 cells using Anti-PCNA Antibody (green) and negative control (red).
