

PRODUCT DATA SHEET

Bioworld Technology, Inc.

ZNF73 polyclonal antibody

Catalog: BS32156

Host: Rabbit

Reactivity: Human

BackGround:

ZNF73 (zinc finger protein 73) is a member of the large family of C2H2-type zinc finger proteins, which function primarily as transcription factors that bind DNA and regulate gene expression. The specific targets and biological roles of ZNF73 remain largely uncharacterized.

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~50-60 kDa (C2H2 zinc finger protein)

Swiss-Prot:

O43830

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/1000)

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Recognizes endogenous levels of ZNF73 protein.

DATA:

Western blot analysis of ZNF73 (Phospho-S366) expression in DLD (A), rat muscle (B) whole cell lysates.

Immunohistochemical analysis of ZNF73 (Phospho-S366) staining in human prostate cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Note:

For research use only, not for use in diagnostic procedure.
