

PRODUCT DATA SHEET

Bioworld Technology, Inc.

ZNF219 polyclonal antibody

Catalog: BS32216

Host: Rabbit

Reactivity: Human

BackGround:

Zinc finger protein 219: Transcriptional regulator . Recognizes and binds 2 copies of the core DNA sequence motif 5'-GGGGG-3' . Binds to the HMGN1 promoter and may repress HMGN1 expression . Regulates SNCA expression in primary cortical neurons . Binds to the COL2A1 promoter and activates COL2A1 expression, as part of a complex with SOX9 (By similarity). Plays a role in chondrocyte differentiation (By similarity)

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~76.9 kDa

Swiss-Prot:

Q9P2Y4

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/1000)

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Recognizes endogenous levels of ZNF219 protein.

DATA:

Western blot analysis of PRKAR2A expression in HEK293T (A), MDAMB231 (B) whole cell lysates.

Immunofluorescent analysis of PRKAR2A staining in H9C2 cells. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with an AF488-conjugated secondary antibody (green) in PBS at room temperature in the dark. Phalloidin - AF594 was used to stain Actin filaments (red). DAPI was used to stain the cell nuclei (blue).

Note:

For research use only, not for use in diagnostic procedure.
