KCNJ14 polyclonal antibody

Catalog: BS32919

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

ATP-sensitive inward rectifier potassium channel 14: Inward rectifier potassium channels are characterized by a greater tendency to allow potassium to flow into the cell rather than out of it. Their voltage dependence is regulated by the concentration of extracellular potassium; as external potassium is raised, the voltage range of the channel opening shifts to more positive voltages
