

PRODUCT DATA SHEET

Bioworld Technology, Inc.

MAB21L1 polyclonal antibody

Catalog: BS33697

Host: Rabbit

Reactivity: Human, Mouse

BackGround:

Putative nucleotidyltransferase required for several aspects of embryonic development including normal development of the eye. It is unclear whether it displays nucleotidyltransferase activity in vivo. Binds single-stranded RNA (ssRNA)

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~41.0 kDa

Swiss-Prot:

Q13394

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/1000)

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Recognizes endogenous levels of MAB21L1 protein

DATA:

Western blot analysis of DLX3 expression in mouse testis (A), rat testis (B) whole cell lysates.

Immunohistochemical analysis of DLX3 staining in human brain formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Immunofluorescent analysis of DLX3 staining in HEK293T cells. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with a DyLight 594-conjugated secondary antibody (red) in PBS at room temperature in the dark.

Note:

For research use only, not for use in diagnostic procedure.
