DATA:

Western blot analysis of Serpin A3 expression in A549 (A) whole cell lysates.

Immunohistochemical analysis of Serpin A3 staining in human endometrial cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Flow cytometric analysis of A549 cells using Anti-Serpin A3 Antibody (green) and negative control (red).
