FAM155A polyclonal antibody

Catalog: BS33818

Host: Rabbit

Reactivity: Human, Mouse

BackGround:

NALCN channel auxiliary factor 1: Auxiliary subunit component of the NALCN channelosome complex, which regulates the resting membrane potential by depolarizing sodium leak currents. The NALCN channelosome complex is a voltage-gated ion channel responsible for the resting Na(+) permeability that controls neuronal excitability. The NALCN channelosome is constitutively active and conducts monovalent cations but is blocked by physiological concentrations of extracellular divalent cations.
