

GALNTL5 polyclonal antibody

Catalog: BS33832

Host: Rabbit

Reactivity: Human, Mouse

BackGround:

Inactive polypeptide
N-acetylgalactosaminyltransferase-like protein 5: Probable inactive glycosyltransferase required during spermatid development. May participate in protein loading into the acrosomes and accumulation of ubiquitin-proteasome systems around the head-tail coupling apparatus region

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~51.4 kDa

Swiss-Prot:

Q7Z4T8

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/1000)

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Recognizes endogenous levels of GALNTL5 protein

DATA:

Western blot analysis of Serpin A1 expression in HepG2 (A), NIH3T3 (B) whole cell lysates.

Immunohistochemical analysis of Serpin A1 staining in human lung formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Note:

For research use only, not for use in diagnostic procedure.
