

**POLR2J2 polyclonal antibody**

Catalog: BS34122

Host: Rabbit

Reactivity: Human

BackGround:

DNA-directed RNA polymerase II subunit RPB11-b1: DNA-dependent RNA polymerase catalyzes the transcription of DNA into RNA using the four ribonucleoside triphosphates as substrates. Component of RNA polymerase II which synthesizes mRNA precursors and many functional non-coding RNAs. Pol II is the central component of the basal RNA polymerase II transcription machinery. It is composed of mobile elements that move relative to each other. RPB11 is part of the core element with the central large cleft (By similarity)
