

PRODUCT DATA SHEET

Bioworld Technology, Inc.

TGM7 polyclonal antibody

Catalog: BS34292

Host: Rabbit

Reactivity: Human

BackGround:

Protein-glutamine gamma-glutamyltransferase Z: Catalyzes the cross-linking of proteins and the conjugation of polyamines to proteins

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~79.9 kDa

Swiss-Prot:

Q96PF1

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/1000)

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Recognizes endogenous levels of TGM7 protein

DATA:

Western blot analysis of Vimentin (Phospho-S39) expression in PMVEC (A), A2780 (B), NIH3T3L1 (C) whole cell lysates.

Immunohistochemical analysis of Vimentin (Phospho-S39) staining in human stomach cancer formalin fixed paraffin embedded tissue section.

The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Immunofluorescent analysis of Vimentin (Phospho-S39) staining in MCF7 cells. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with a AF488-conjugated secondary antibody (green) in PBS at room temperature in the dark. Phalloidin - AF594 was used to stain Actin filaments (red). DAPI was used to stain the cell nuclei (blue).

Note:

For research use only, not for use in diagnostic procedure.
