

PRODUCT DATA SHEET

Bioworld Technology, Inc.

DDX10 polyclonal antibody

Catalog: BS34558

Host: Rabbit

Reactivity: Human, Mouse

BackGround:

Probable ATP-dependent RNA helicase DDX10: Putative ATP-dependent RNA helicase that plays various role in innate immunity or inflammation. Plays a role in the enhancement of AIM2-induced inflammasome activation by interacting with AIM2 and stabilizing its protein level. Negatively regulates viral infection by promoting interferon beta production and interferon stimulated genes/ISGs expression

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~101 kDa

Swiss-Prot:

Q13206

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/1000)

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Recognizes endogenous levels of DDX10 protein

DATA:

Western blot analysis of CD205 expression in human tonsil (A) whole cell lysates.

Immunofluorescent analysis of CD205 staining in RAW264.7 cells.

Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with an AF488-conjugated secondary antibody (green) in PBS at room temperature in the dark. Phalloidin - AF594 was used to stain Actin filaments (red). DAPI was used to stain the cell nuclei (blue).

Note:

For research use only, not for use in diagnostic procedure.
