

PRODUCT DATA SHEET

Bioworld Technology, Inc.

KIRREL3 polyclonal antibody

Catalog: BS35020

Host: Rabbit

Reactivity: Human, Mouse

BackGround:

Kin of IRRE-like protein 3: Synaptic adhesion molecule required for the formation of target-specific synapses. Required for formation of target-specific synapses at hippocampal mossy fiber synapses. Required for formation of mossy fiber filopodia, the synaptic structures connecting dentate granule and GABA neurons. Probably acts as a homophilic adhesion molecule that promotes trans-cellular interactions and stabilize mossy fiber filopodia contact and subsequent synapse formation. Required for the coalescence of vomeronasal sensory neuron axons. May be involved in the hematopoietic supportive capacity of stroma cells; the secreted extracellular domain is directly responsible for supporting hematopoietic stem cells

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~85.3 kDa

Swiss-Prot:

Q8IZU9

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/1000)

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Recognizes endogenous levels of KIRREL3 protein

DATA:

Western blot analysis of AMBP expression in CEM (A), U251 (B) whole cell lysates.

Note:

For research use only, not for use in diagnostic procedure.
