

**TEX38 polyclonal antibody**

Catalog: BS35092

Host: Rabbit

Reactivity: Human

BackGround:

Testis-expressed protein 38: Plays an essential role in male fertility. TEX38 and ZDHHC19 form a complex in developing sperm. This complex may regulate S-palmitoylation of the proteins that are essential for generating functional sperm with the correct morphology

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~23.3 kDa

Swiss-Prot:

Q6PEX7

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/1000)

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Recognizes endogenous levels of TEX38 protein

DATA:

Western blot analysis of CNOT4 expression in mouse cerebellum (A) whole cell lysates.

Immunohistochemical analysis of CNOT4 staining in human testis formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Flow cytometric analysis of U2OS cells using Anti-CNOT4 Antibody. The cells were fixed with 2% paraformaldehyde (10 min) and then permeabilized with 90% methanol for 10 min. The cells were incubated in 2% bovine serum albumin to block non-specific protein-protein interactions followed by the antibody at 37 °C for 60 min. The secondary antibody Goat Anti-Rabbit IgG (H&L) - AF488 was incubated at 37 °C for 40 min. Isotype control antibody (blue line) was used under the same condition.

Note:

For research use only, not for use in diagnostic procedure.
