Recognizes endogenous levels of TBATA protein

DATA:

Western blot analysis of MGP expression in MCF7 (A), mouse lung (B), mouse heart (C) whole cell lysates.

Immunohistochemical analysis of MGP staining in human brain formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
