

PRODUCT DATA SHEET

Bioworld Technology, Inc.

MED8 polyclonal antibody

Catalog: BS35380

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

Mediator of RNA polymerase II transcription subunit 8: Component of the Mediator complex, a coactivator involved in the regulated transcription of nearly all RNA polymerase II-dependent genes. Mediator functions as a bridge to convey information from gene-specific regulatory proteins to the basal RNA polymerase II transcription machinery. Mediator is recruited to promoters by direct interactions with regulatory proteins and serves as a scaffold for the assembly of a functional preinitiation complex with RNA polymerase II and the general transcription factors. May play a role as a target recruitment subunit in E3 ubiquitin-protein ligase complexes and thus in ubiquitination and subsequent proteasomal degradation of target proteins

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~29.1 kDa

Swiss-Prot:

Q96G25

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/1000)

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Recognizes endogenous levels of MED8 protein

DATA:

Western blot analysis of GALT expression in SKOV3 (A), HepG2 (B) whole cell lysates.

Note:

For research use only, not for use in diagnostic procedure.
