

**TLCD1 polyclonal antibody**

Catalog: BS35519

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

TLC domain-containing protein 1: Regulates the composition and fluidity of the plasma membrane. Inhibits the incorporation of membrane-fluidizing phospholipids containing omega-3 long-chain polyunsaturated fatty acids (LCPUFA) and thereby promotes membrane rigidity. Does not appear to have any effect on LCPUFA synthesis

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~28.5 kDa

Swiss-Prot:

Q96CP7

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/1000), IHC (1/50 - 1/200)

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long

term. Avoid freeze-thaw cycles.

Specificity:

Recognizes endogenous levels of TLCD1 protein

DATA:

Western blot analysis of Annexin A2 (Phospho-S26) expression in mouse lung (A), rat lung (B), rat liver (C) whole cell lysates.

Immunofluorescent analysis of Annexin A2 (Phospho-S26) staining in A549 cells. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with a AF488-conjugated secondary antibody (green) in PBS at room temperature in the dark. Phalloidin - AF594 was used to stain Actin filaments (red). DAPI was used to stain the cell nuclei (blue).

Note:

For research use only, not for use in diagnostic procedure.
