

PRODUCT DATA SHEET

Bioworld Technology, Inc.

SLC35A4 polyclonal antibody

Catalog: BS35743

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

Probable UDP-sugar transporter protein SLC35A4: Mediates the transport of CDP-ribitol. Does not exhibit CMP-sialic acid, UDP-galactose and UDP-N-acetylglucosamine transport activity

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~34.6 kDa

Swiss-Prot:

Q96G79

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/1000)

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Recognizes endogenous levels of SLC35A4 protein

DATA:

Western blot analysis of Laminin beta 1 expression in Hela (A) whole cell lysates.

Immunohistochemical analysis of Laminin beta 1 staining in human hepatocellular cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Immunofluorescent analysis of Laminin beta 1 staining in HepG2 cells. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with an AF488-conjugated secondary antibody (green) in PBS at room temperature in the dark. Phalloidin - AF594 was used to stain Actin filaments (red). DAPI was used to stain the cell nuclei (blue).

Note:

For research use only, not for use in diagnostic procedure.
