

PRODUCT DATA SHEET

Bioworld Technology, Inc.

AMELY polyclonal antibody

Catalog: BS35851

Host: Rabbit

Reactivity: Human

BackGround:

Amelogenin, Y isoform: Plays a role in biomineralization. Seems to regulate the formation of crystallites during the secretory stage of tooth enamel development. Thought to play a major role in the structural organization and mineralization of developing enamel

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~23.2 kDa

Swiss-Prot:

Q99218

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/1000)

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long

term. Avoid freeze-thaw cycles.

Specificity:

Recognizes endogenous levels of AMELY protein

DATA:

Western blot analysis of Gamma-enolase expression in mouse brain (A), NIH3T3 (B), C6 (C) whole cell lysates.

Immunohistochemical analysis of Gamma-enolase staining in human lung cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Flow cytometric analysis of HeLa cells using Anti-Gamma-enolase Antibody (green) and negative control (red).

Note:

For research use only, not for use in diagnostic procedure.
