

**ARHGEF37 polyclonal antibody**

Catalog: BS35994

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

Rho guanine nucleotide exchange factor 37: Probable guanine nucleotide exchange factor (GEF) involved in clathrin-mediated endocytosis, probably playing a role in the late stages of the process

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~76.3 kDa

Swiss-Prot:

A1IGU5

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/1000)

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Recognizes endogenous levels of ARHGEF37 protein

DATA:

Western blot analysis of FAM168B expression in human brain (A) whole cell lysates.

Immunohistochemical analysis of FAM168B staining in human brain formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Flow cytometric analysis of SHSY5Y cells using Anti-FAM168B Antibody. The cells were fixed with 2% paraformaldehyde (10 min) and then permeabilized with 90% methanol for 10 min. The cells were incubated in 2% bovine serum albumin to block non-specific protein-protein interactions followed by the antibody at 37 °C for 60 min. The secondary antibody Goat Anti-Rabbit IgG (H&L) - AF488 was incubated at 37 °C for 40 min. Isotype control antibody (blue line) was used under the same condition.

Note:

For research use only, not for use in diagnostic procedure.
