

PRODUCT DATA SHEET

Bioworld Technology, Inc.

MPND polyclonal antibody

Catalog: BS36076

Host: Rabbit

Reactivity: Human, Mouse

BackGround:

MPN domain-containing protein: Probable protease (By similarity). Acts as a sensor of N(6)-methyladenosine methylation on DNA (m6A); recognizes and binds m6A DNA, leading to its degradation. Binds only double strand DNA (dsDNA) in a sequence-independent manner (By similarity)

Product:

1mg/ml in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.

Molecular Weight:

~50.7 kDa

Swiss-Prot:

Q8N594

Purification&Purity:

The antibody was purified by immunogen affinity chromatography.

Applications:

WB (1/500 - 1/1000)

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Recognizes endogenous levels of MPND protein

DATA:

Western blot analysis of Catalase expression in rat prostate (A), mouse kidney (B), A549 (C), LO2 (D) whole cell lysates.

Immunohistochemical analysis of Catalase staining in human brain formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

Immunofluorescent analysis of Catalase staining in MCF7 cells. Formalin-fixed cells were permeabilized with 0.1% Triton X-100 in TBS for 5-10 minutes and blocked with 3% BSA-PBS for 30 minutes at room temperature. Cells were probed with the primary antibody in 3% BSA-PBS and incubated overnight at 4 °C in a humidified chamber. Cells were washed with PBST and incubated with a AF488-conjugated secondary antibody (green) in PBS at room temperature in the dark. Phalloidin - AF594 was used to stain Actin filaments (red). DAPI was used to stain the cell nuclei (blue).

Note:

For research use only, not for use in diagnostic procedure.
