

FKBP8 Recombinant Rabbit mAb

Catalog: BS49724

Host: Rabbit

Reactivity: Human

BackGround:

The protein encoded by this gene is a member of the immunophilin protein family, which play a role in immunoregulation and basic cellular processes involving protein folding and trafficking. Unlike the other members of the family, this encoded protein does not seem to have PPIase/rotamase activity. It may have a role in neurons associated with memory function.
