

Phospho-RIP3 (Ser164/Thr165) Recombinant Rabbit mAb

Catalog: BS49962

Host: Rabbit

Reactivity: Mouse

BackGround:

Enables protein serine/threonine kinase activity. Involved in several processes, including execution phase of necroptosis; hematopoietic or lymphoid organ development; and positive regulation of necroptotic process. Acts upstream of or within with a positive effect on non-canonical NF-kappaB signal transduction. Acts upstream of or within several processes, including positive regulation of intrinsic apoptotic signaling pathway; positive regulation of ligase activity; and regulation of reactive oxygen species metabolic process. Located in cytoplasm and nucleus. Is expressed in several structures, including alimentary system; central nervous system; immune system; male reproductive gland or organ; and turbinates bone primordium. Orthologous to human RIPK3 (receptor interacting serine/threonine kinase 3). [provided by Alliance of Genome Resources, Apr 2025]

Product:

1mg/ml in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and 0.05% BSA.

Molecular Weight:

62 kDa

Swiss-Prot:

Q9QZL0

Purification&Purity:

Affinity Purification

Applications:

WB: 1:1000

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

The antibody detects endogenous levels of it.

DATA:

Note:

For research use only, not for use in diagnostic procedure.
