

VPS26A Recombinant Rabbit mAb

Catalog: BS50117

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

This gene belongs to a group of vacuolar protein sorting (VPS) genes. The encoded protein is a component of a large multimeric complex, termed the retromer complex, involved in retrograde transport of proteins from endosomes to the trans-Golgi network. The close structural similarity between the yeast and human proteins that make up this complex suggests a similarity in function. Expression studies in yeast and mammalian cells indicate that this protein interacts directly with VPS35, which serves as the core of the retromer complex. Alternative splicing results in multiple transcript variants encoding different isoforms. [provided by RefSeq, Jul 2008]

Product:

1mg/ml in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and 0.05% BSA.

Molecular Weight:

38 kDa

Swiss-Prot:

O75436

Purification&Purity:

Affinity Purification

Applications:

WB: 1:1000-1:10000
ICC/IF: 1:200-1:1000
IP: 1:50-1:200

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

The antibody detects endogenous levels of it.

DATA:

Western blot analysis of extracts from HeLa, HepG2 cells and Mouse heart, Rat heart tissues using it at 1:1000.

Note:

For research use only, not for use in diagnostic procedure.
