

Aldolase A Recombinant Rabbit mAb

Catalog: BS50163

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

This gene encodes a member of the class I fructose-bisphosphate aldolase protein family. The encoded protein is a glycolytic enzyme that catalyzes the reversible conversion of fructose-1,6-bisphosphate to glyceraldehyde 3-phosphate and dihydroxyacetone phosphate. Three aldolase isozymes (A, B, and C), encoded by three different genes, are differentially expressed during development. Mutations in this gene have been associated with Glycogen Storage Disease XII, an autosomal recessive disorder associated with hemolytic anemia. Disruption of this gene also plays a role in the progression of multiple types of cancers. Related pseudogenes have been identified on chromosomes 3 and 10. [provided by RefSeq, Sep 2017]

Product:

1mg/ml in 50mM Tris-Glycine(pH 7.4), 0.15M NaCl, 40% Glycerol, 0.01% sodium azide and 0.05% BSA.

Molecular Weight:

40 kDa

Swiss-Prot:

P04075, P05064, P05065

Purification&Purity:

Affinity Purification

Applications:

WB: 1:1000 IHC-P: 1:100 ICC/IF: 1:50-1:100 FC: 1:50-1:100

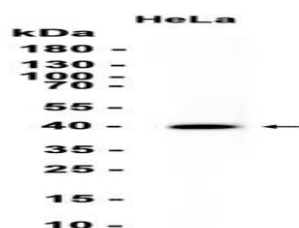

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

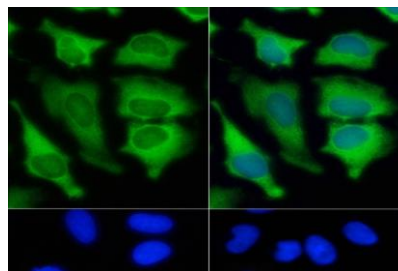

Specificity:

The antibody detects endogenous levels of it.

DATA:

Western blot analysis of extracts from HeLa cells using it at 1:1000.

Immunofluorescence analysis of HeLa cells labelling CBS with it.

Note:

For research use only, not for use in diagnostic procedure.
