Synoviolin Rabbit monoclonal antibody

Catalog: BS66307 Host: Rabbit Reactivity: Human, Mouse, Rat

BackGround:

This gene encodes a protein involved in endoplasmic reticulum (ER)-associated degradation. The encoded protein removes unfolded proteins, accumulated during ER stress, by retrograde transport to the cytosol from the ER. This protein also uses the ubiquitin-proteasome system for additional degradation of unfolded proteins. Sequence analysis identified two transcript variants that encode different isoforms.
