

JAK3 monoclonal antibody

Catalog: MB21265

Host: Mouse

Reactivity: Human, Mouse

Background:

JAK3, Janus kinase 3. It is a member of the Janus kinase (JAK) family of tyrosine kinases involved in cytokine receptor-mediated intracellular signal transduction. It is predominantly expressed in immune cells and transduces a signal in response to its activation via tyrosine phosphorylation by interleukin receptors. Mutations in this gene are associated with autosomal SCID (severe combined immunodeficiency disease).

Product:

Purified antibody in PBS with 0.05% sodium azide.
