NR1H4 Mouse monoclonal antibody

Catalog: MB67309 Host: Mouse Reactivity: Human, Mouse

BackGround:

This gene encodes a ligand-activated transcription factor that shares structural features in common with nuclear hormone receptor family members. This protein functions as a receptor for bile acids , and when bound to bile acids , binds to DNA and regulates the expression of genes involved in bile acid synthesis and transport. Alternatively spliced transcript variants encoding different isoforms have been described.
