## PRODUCT SPECIFICATIONS

|                 |                                                                                                                 |
|-----------------|-----------------------------------------------------------------------------------------------------------------|
| Product Name    | Recombinant Human TSHR Protein                                                                                  |
| Catalog#        | NBP0299                                                                                                         |
| Description     | Recombinant Human thyroid-stimulating hormone receptor(TSHR) protein is produced by Mammalian expression system |
| Source          | HEK293 cells                                                                                                    |
| Formulation     | Supplied as a 0.2 µm filtered solution of PBS, pH7.4                                                            |
| Quality control | Mol Mass: 75.2 kDa AP Mol Mass: 80-95 kDa<br>Purity: ≥90% as determined by reducing SDS-PAGE                    |
| Concentration   | Lot specific(±20%)                                                                                              |
| Purification    | Affinity purification chromatography                                                                            |
| Application     | Immunogen, calibrator, standard or other applications                                                           |
| Shipping        | The product is shipped on ice pack. Upon receipt, store it immediately at -20°C or lower.                       |
| Storage         | Short term (up to 7 days) store at 2–8°C. Long term, store at -20°C. Avoid multiple freeze/thaw cycles.         |
