## PRODUCT SPECIFICATIONS

|                 |                                                                                                                                     |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------|
| Product Name    | Human CA19-9 protein                                                                                                                |
| Catalog#        | NBP0451                                                                                                                             |
| Description     | Human Cancer antigen 19-9(CA19-9) protein is produced by Colo 205 cell line and purified by proprietary chromatographic techniques. |
| Source          | Colo 205 cells                                                                                                                      |
| Formulation     | Supplied as a 0.2 $\mu$ m filtered solution of PBS, pH7.4                                                                           |
| Quality control | $\geq 20$ ku/mL                                                                                                                     |
| Concentration   | Lot specific( $\pm 20\%$ )                                                                                                          |
| Purification    | Proprietary purification chromatography                                                                                             |
| Application     | Immunogen, calibrator, standard or other applications                                                                               |
| Shipping        | The product is shipped on ice pack. Upon receipt, store it immediately at -20°C or lower.                                           |
| Storage         | Short term (up to 7 days) store at 2–8°C. Long term, store at -20°C. Avoid multiple freeze/thaw cycles.                             |
